

F⁵

FCUDA:

Friendly Front-ends for FPGA Fast-Start

Kyle Rupnow

Alex Papakonstantinou, Karthik Gururaj, John Stratton, Ying Chen,
Yao Chen, Tan Nguyen, Swathi Gurumani, Eric Liang,
Jacob Tolar, Deming Chen, Wen-mei Hwu, Jason Cong

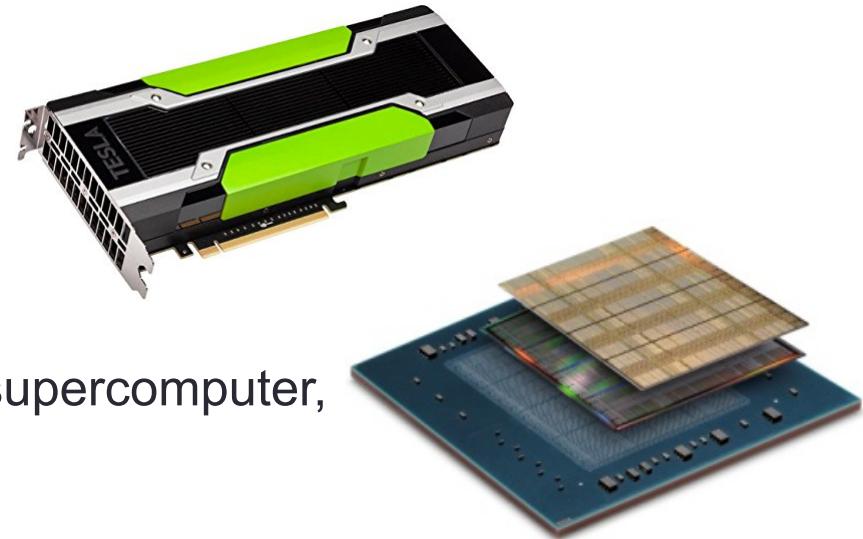

What is Fast-Start

- Low startup to initial solution
- Familiar programming interface
- Fast development iteration
- Development flow
 - Kernel
 - Debugging
 - System-level design
 - Platform integration

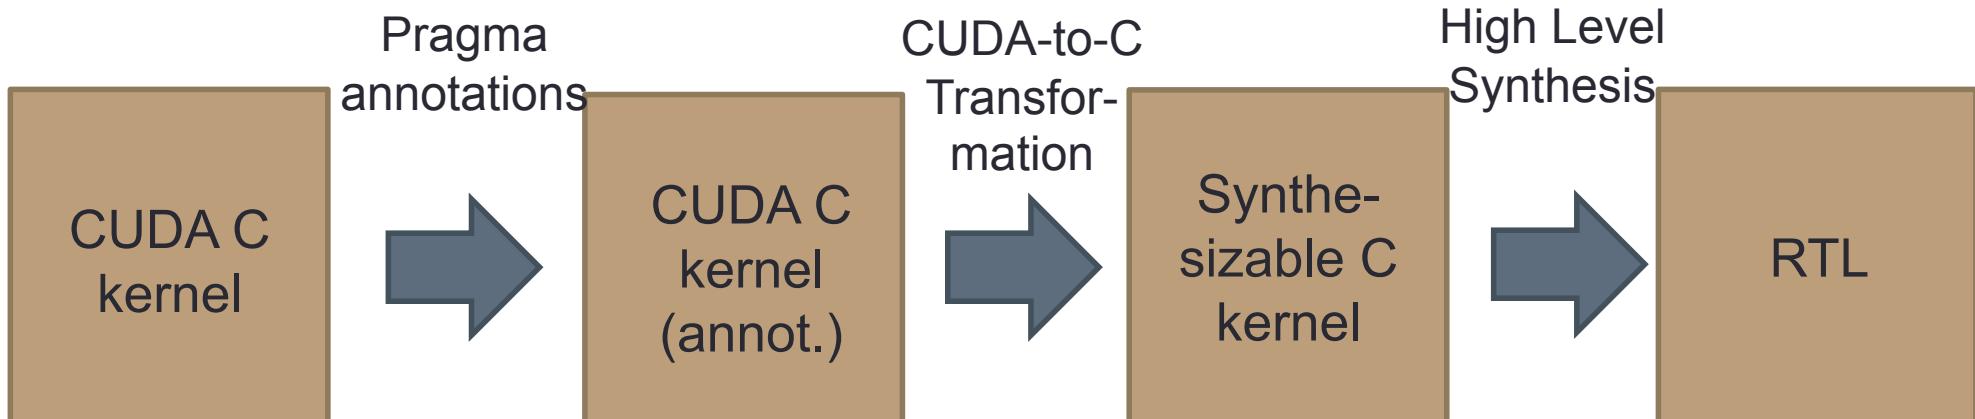

Motivations

- GPUs and FPGAs: accelerators in HPC
 - NVIDIA GPUs (Google, Baidu, Blue Waters supercomputer,
 - FPGAs (Microsoft Bing search, ...)
- NVIDIA GPUs
 - Massively parallelism thanks to the CUDA programming model
 - Power hungry
- FPGAs
 - Low energy consumption, high flexibility
 - Low programming abstraction
 - High Level Synthesis
 - But parallelism extraction may be limited

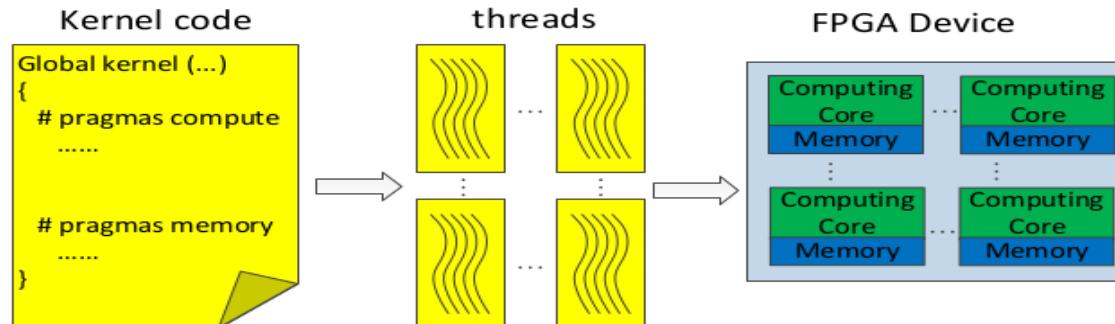

FCUDA

- FCUDA Introduction
 - CUDA-to-RTL compiler (ASAP'09, FCCM'11, DAC'13)
 - Front-end: CUDA-to-C (Cetus + MCUDA)
 - Back-end: C-to-RTL (High Level Synthesis tool --Vivado HLS)
- Source-to-source transformation
- Does not employ NVIDIA compiler infrastructure (NVCC, NVMM IR, ...)

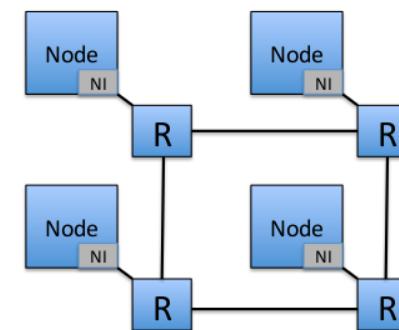

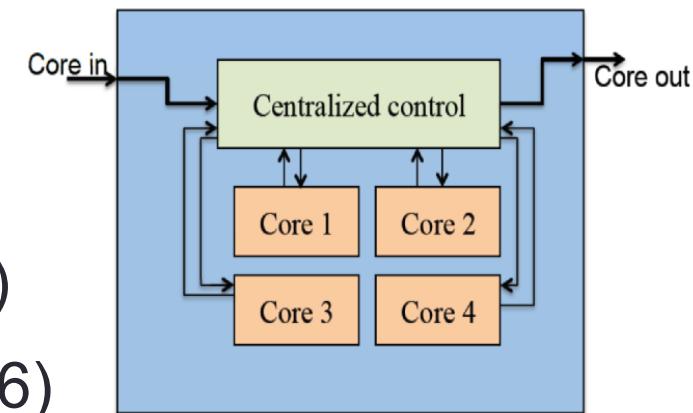

FCUDA History

- FCUDA Introduction
 - CUDA-to-RTL compiler (ASAP'09, FCCM'11, DAC'13)
 - Front-end: CUDA-to-C (Cetus + MCUDA)
 - Back-end: C-to-RTL (High Level Synthesis tool --Vivado HLS)
- Source-to-source transformation
- Does not employ NVIDIA compiler infrastructure (nvcc, nvvm, ...)
- Why FCUDA?
 - Enable CUDA kernel's execution on FPGA
 - CUDA's SIMD programming model is attractive to FPGA

FCUDA System Backend

- Prior FCUDA works focused on building a “prototype”
 - Single top-level function with centralized control of cores
 - No discussion on a full system integration of cores vs. external memory
- System implementation works:
 - FCUDA NoC: Mesh-based NoC (TVLSI'15)
 - FCUDA HB: Hierarchical AXI Bus (TCAD'16)
 - FCUDA SoC: (FPGA'16)

FCUDA Open-source

- Available to download at: <http://dchen.ece.illinois.edu/tools.html>
- The open-source software includes:
 - FCUDA CUDA-to-C compiler
 - FCUDA Benchmarks: set of benchmarks for testing FCUDA
 - FCUDA SoC tool flow: scripts for the automation of FCUDA system on SoC platform
- In the next few weeks:
 - FCUDA NoC, FCUDA HB, Design Space Exploration framework
